

Privacy notice

How the site handles contact requests and basic technical data.

Plain-language notice

This document supports the payment gateway onboarding and integration service at paymentgatewayforgaminginindia.com. It has not been presented as lawyer-reviewed and is not legal advice.

1. Scope

This notice applies to the single-page service at paymentgatewayforgaminginindia.com and its contact form. GPI Gateway is the name used for the gaming payment gateway onboarding, integration and operations service.

2. Data we collect

When you send the contact form, we collect the name, work email, company, selected business model and message that you provide. We also retain a one-way hash of the connecting IP address, a shortened user-agent string and the submission time for basic abuse prevention and operational troubleshooting.

Do not include passwords, payment credentials, player identity records, card data, government identifiers or other sensitive information in the form.

3. Why we use it

We use submitted information to review and respond to a gateway access request, understand service demand, protect the form from misuse, maintain a record of communications and comply with applicable obligations. We do not sell contact-form data or automatically send it to payment providers as part of the form submission.

4. Storage and retention

Form submissions are stored in a Cloudflare D1 database connected to the site. Cloudflare also processes normal delivery and security logs as part of hosting the site. We aim to remove contact requests that are no longer needed within 12 months, unless a longer period is required for an active engagement, security investigation or legal obligation.

5. Sharing

Data may be processed by infrastructure providers that support hosting, database storage and security. If you proceed with onboarding, relevant information may be shared with contracted banking, acquiring or payment partners when needed for the service and with appropriate notice or consent. Data may also be disclosed when reasonably necessary to comply with law, protect rights or investigate abuse. We do not claim that data remains only in India; infrastructure processing may involve other locations subject to provider arrangements.

6. Your choices

You may ask for access, correction or deletion of the information you submitted, subject to applicable law and legitimate retention needs. Contact contact@paymentgatewayforgaminginindia.com. We may ask for enough information to verify the request.

7. Security and changes

We use access controls, encrypted transport and limited collection, but no online service can promise absolute security. We may update this notice when the service or its data practices change. The date in the document header is the latest review date.
